

REDCLIFFE GOLD PROJECT
Nambi South Pit
 Pit Plan w/Geology
 WGS84 / GDA94 Zone 51

- Archaean
- Dolerite
 - Intercalated mafic & intermediate volcanics
 - Indeterminate sediments as siltstones & shales
 - Felsic intrusive
 - Silica-sericite alteration within sheared & mylonitised mafic volcanics
- Intermediate intrusive; doletite
 - Sheared felsic intrusive
 - Quartz as silicious exhalative horizon
 - Quartz; vuggy & gossanous
 - Dense ironstone outcrop
 - Iron indurated outcrop; as laminations
 - Channel sample; intervals cut with diamond saw. Red = +0.5g/t Au
 - Inferred mineralised zone; >1g/t Au within sericite altered mafic mylonite
 - Open Pit
